

## Typical Site Investigations for a GHG Subsidence Claim

**PHOTOGRAPH 01:**

This shows a typical trial hole, exposing the underside of the foundations (marked with the hand trowel).

**PHOTOGRAPH 02:**

This photograph shows a trial hole exposing the existing foundations and the top of the bore hole that is hand driven at the bottom of the hole.

**PHOTOGRAPH 03:**

This photograph shows the type of CCTV equipment used to inspect the drains.

**PHOTOGRAPH 04:**

This photograph shows metal 'demec' studs fitted to an external wall. These studs are used to accurately measure any changes in the cracks over time
